

## General Earth Populations Partnership Meeting Weeks in Cologne

About one and a half years ago I thought about some more natural company forms for whole peoples than the one I live in, the supposed democratic and social state in the form of a geographical corporation which is a capital company and nothing else but with endless limited liability. Heavily overindebted but not incapable to pay with self-printed money triggering inflation rises in a reliable regularity. Freely ignoring the popes numerus clausus I realised that others agreed when I described a company consisting of all types of life pursuing the same purpose of enjoying life as naturally as it is, and every human member sharing its fortunes and successes regarding more than anything else necessary nature rehabilitation efforts but responsibilities for our five core values and complying with them too living in a fair system soon. No lies about natural facts any longer, more than ever regarding natural consciousness infrastructures, like hiding different communication channels except for conversation with eye contact or on the phone or radio and tv, already half true in one direction only.

The problem was the question how binding the signals were which I received especially over radio and tv. Receiving and separating disagreeing from agreeing signals of animals for instance is much easier than via new communication channels of human beings who hide them generally and deny them when they are never the less discovered until they cannot be denied any longer but then be used first to cheat, unless the newcomer can be terrified like they did with everybody else before, and not to stick to their promises or agreements concluded through such formerly hidden channels, since you still cannot prove what everybody knows but denies. This crazy behaviour refers to human beings who I even am familiar with. Since I cannot trust them any more unless I have visible evidence, unfortunately this influences my general trust in human beings, so that doubts are allowed whether human beings who I see on tv or hear on radio only would ever admit honestly that they declared their wills replying to a certain question I asked them and everything else what was around in this moment, when they were on tv. You feel that the respective other side and you are on the same level of agreement whereas you know everything around is, but later in the decisive dimension of individual life nothing happens. Especially when there are language barriers between the communicating individuals as well. In my environment I speak German mostly and people from around the world seem to understand what at least may be doubted but as well as even animals what in contrary is not much doubtable any more since two evenings ago, at least, when everybody on the streets around Brüsseler Platz (Brussels square) in cologne ear witnessed the clear and decided agreeing mighty sounds who addressed in the same time us as replies as well as all birds in coverage distance from above to our collective earth populations community feelings collectively sent in form of only two or three round vibration impulses in all three, maybe four, dimensional directions from its origin in the middle, from Brussels square, cologne.

So my cautious estimation of those very new semitechnical channels via tv and radio only one and a half years ago when nobody else except for animals again were physically around, seemed appropriate this time again when I expressed the idea of the first two general meeting weeks of our new earth populations society model which one year ago only in doubt has come into living existence as the then so called F.Land n.EBGbR (in English: Freeland earth population partnership organised under natural law, i. e. F.Land nepp). This time there was only one more of course agreeing individual physically around who certainly would come to the same cautious estimation whether these semi technical signals had a binding meaning.

However, three or four days later, after this collective Brussels square experience I still doubt but a little less that also the signals sent and sent back via tv, including pictures and reports from and to Sweden for example showing Greta and her friends waving Friday school lessons for better time use, even it was not a Friday and the pictures were not live but clearly visible living and interacting, felt similar at the other communication end. Therefore, by the way, I hope to count some visitors from Sweden on [www.familienzuechtigung.com](http://www.familienzuechtigung.com) next Friday when google analytics has been running in the background for the first week.

So although this natural partnership has clearly come into living existence at the latest on Brussels square where everybody including our birds shared and expressed the same feelings about it by conclusive behaviour, I still would be very pleased if I counted many visits on the website from wherever **as additional and presentable evidence of agreement** especially since everybody no matter from where is invited to join and share the consciousness of this society consisting of naturals with the same views on these few essential issues plus which will surprise nobody being implemented as our own legal living framework on day in Freeland, former Germany, open to be adopted in the similar suffering European neighbourhood if implementation assistance would be requested for example for the sake of good and smooth international trade relations and rehabilitated natural value chains **a certain higher amount of visitors (not on my crime@site but on my website) during these two meeting weeks than before would indicate.**

If another certain part of them then even come from far abroad this would not only please me but cologne and even Germany too (insofar I have to be cautious again, since I can only guess not know the natural geographic coverage distance of my original thoughts). For the sake of the easiest liberation action possible which is required from our liberation army in any thinkable case as we know that otherwise no official would ever move, I hope that I might cover around 50 km at least which included Bonn and touched Düsseldorf. There was a hint in the movie "Lawrence of Arabia" that this distance might be realistic.

I am aware of many international observers being in or near cologne in all existing human aggregation conditions and hopefully reporting or carrying the fresh spirit as pure as it is around

the globe ignoring all official efforts in Germany and Europe to cover or even close spiritual communication rooms spheres and areas as tightly as possible by unnaturally unlawful means which became apparent so far in form of very small click counts on my internet pages for example. Therefore something like a clearly visible visit boost from European countries and out of Europe could increase the (inner) panic, little Greta and little peter wish growing within some Davos circles, certainly not all Davos people, who would rather avoid to share our eternal catholic guilt analysis results.

My mood is not always as optimistic as today, given the unhuman living conditions in general and the concrete typical terror regime suppression of myself both provided for by the German legal framework and acting authorities likewise.

In a significantly less optimistic moment during the past week when I did not have a sleeping place for three days and hurting feet from walking around and collecting deposit bottles and cans for a few coins for food I already sent a somewhat personalized emergency email to the Thai receivers of my current human rights violations reports because other than Mrs May I know them personally. I hope they read this better news now too and feel delighted to hear or read that I found the next proper way how the liberation of the country can take place not only theoretically as the last not yet proposed constitutional way but also practically as feasible and how. They know this way from several own experiences not of such unhuman living conditions but and because of how to replace the government consisting of the in Europe modern civil political class by a government built of military forces who care more sometimes and in other regions what is not difficult to imagine. Even less difficult in Thailand probably than somewhere else which is a very honourable kingdom with a caring royal family who would never think about cheating their people like political class governments. The Thai people therefore are in the comfortable situation to be protected by a royal army of a well running more royal than constitutional kingdom. Reports in European tv news blaming the people being deeply divided do not correspond with my personal experiences and the pictures of these recent elections under the military government did not look alike either.

I assume khun Ped and khun David can imagine how I sometimes feel and do not take every single word too serious about my crazy brother who indeed should show his face soon but who is around without all the time on the other hand. So they are maybe rather curiously expecting the apology of my brother on scientific quality levels (not more than 500 English pages) on which I feel now again we might have come to an agreement earlier already.

Moreover I hope his stuff is not as crazy as their director sleep regularly and would like to translate my logbook entry<sup>7</sup> published today diligently into proper legal English (If they have French and Spanish colleagues as well into these languages) notifying that not I but they translated them with my prior consent in order to divide the translated texts in their fine networks a little bit

around the globe, not without friendly requesting some time(s) on [www.familienzuechtigung.com](http://www.familienzuechtigung.com) of course. I wrote 22 German pages which should eventually trigger real (inner) panic in many responsible criminals who are identified in their full extent now.

Additionally at least some major ones of the lies about the end of world war II, what was not more than a silent weapons agreement followed by civil legislative war actions immediately, have been proved not true and round up the conclusive evidence chain of my logic narration of who is who in this mysterious eternal holocaust scheme covering over 100 years of hot and cold world war times and various serious people murders additionally to the main war purpose of the full completion of the religious pan peoples murder of their Jewish sisters and brothers all over Europe.

I think in this logbook entry I really provided enough motivation for the since May 8, 1945 overdue unconditional catholic capitulation with or without their wills during the first late summer carnival in Rome as well as for the unconditional capitulation of Merkel von der Leyen and Co, due since 1.1.1. (2017 May 8) when I demanded it already but nobody moved.

Everybody knows that this time nobody is going to move either if not (re)moved by our liberation army who is not a royal but a free army soon doing nothing but protecting its own people at home if necessary. Certainly not elsewhere on earth anymore. I do not feel bound by any international military treaty or partnership concluded or entered by the government of this heavy terror and murderer regime. This does not need to be explained further, does it?

Therefore I hope that logbook entry 7 reached rather some parts of our liberation forces than anybody of the criminals who would never step back anyway, motivating them instead to liberate themselves and all of us in the same quite easy operation.

Thank you very much and visit [Kafkas Erbe](#) again please!
