

Steven Spielberg

Why would you like to benefit from six million victims of the third Reich?

Why do you like to provoke and ridicule the central targets (human beings) of the fifth Reich?

You know exactly that your West Side Story took place in reality while you produced the movie and that it is still going on today. That the female was enforced to disappear from her male partner and that both are the presiding couple of humankind proclaimed by god itself. They adore each other and suffer more you would ever be able to imagine. Meanwhile her daughter who had been taken away from her for reasons of crimes against humanity by youth authorities was raped by two pedophile warriors. The German government is involved in the conspiracy and protecting the kidnapers.

You know that America and the other west allies have broken the peace treaties of 1949 in 1990 stipulating 4+2 provisions as precondition of the German unification.

You know that Monday demonstrations in the GDR had been instigated by STASI who had shot at people coming to close to the border for all the three decades just ago. Now suddenly they told the people: go and demonstrate for your freedom. They did and Germany was urged to accept prolongations of sovereignty limits for two further decades. After these two decades the allies broke their words again and America financed the state coup providing for unlimited slavery of the German people in the 21st century. The couple who is being kept separated against their wills are the world peace guarantees if they would live together and build their family. They unite at least the six most strong and ancient people stems of around the world in their genes! Dynasties of eternity of all continents.

Would you please kindly let me know?!

Peter

ps: maybe you can imagine that their fortunes of matchless size have been stolen from them and the head of mankind sleeps on the streets...the world is mine and life spaces on our planet are going to disappear like my goddess disappeared ...congratulations!
